The ROMA™ calculator

Aid in assessing the risk of ovarian cancer in women with a pelvic mass

ROMA™ (Risk of Ovarian Malignancy Algorithm) uses CA125 value, HE4 value and menopausal status as an aid in estimating the risk of epithelial ovarian cancer in premenopausal and postmenopausal women presenting with pelvic mass. ROMA™ calculates a predictive probability of finding epithelial ovarian cancer on surgery.

For pre-menopausal women:

Low Risk 11.4% | High Risk

0% | 100%

ROMA™ value ≥ 11.4% = High risk of finding epithelial ovarian cancer* / ROMA™ value < 11.4% = Low risk of finding epithelial ovarian cancer*

For post-menopausal women:

Low Risk 29.9% | High Risk

0% | 100%

ROMA™ value ≥ 29.9% = High risk of finding epithelial ovarian cancer* / ROMA™ value < 29.9% = Low risk of finding epithelial ovarian cancer*

The Calculator is developed for general educational purposes and for the use by healthcare professionals only. The results of the Calculator are not intended to be used for medical diagnosis or treatment. Healthcare professionals must exercise their own clinical judgment when using information derived from the Calculator.

Disclaimer
ROMA™ has not been validated for the following patient groups: patients previously treated for malignancy, patients currently being treated with chemotherapy, and patients less than 18 years of age. Failure of the Elecsys HEA assay and/or the Elecsys CA 125 II assay to perform as indicated, or error in the calculation of results, could lead to inaccurate risk assessment and improper management of the patient. Specifically, a falsely low result of the assay(s) could result in a determination that the patient is at lower risk of having epithelial ovarian cancer, which could triage the patient to a less specialized level of care. Full terms of service and condition of use can be found on the ROMA host webpage which can be accessed at https://diagnostics.roche.com or by scanning the QR code.

Dear Colleagues,

It is our pleasure to invite you to the 11th International Charité Mayo Conference: “Global Perspectives and Future Directions in Women’s Cancer”. Due to the current situation, we present this year’s scientific program online – as a live stream from our traditional venue: the Langenbeck Virchow Haus in Berlin.

The year 2021 is a very special one. Not only does it bring the 200th birthday of Rudolf Virchow; with the premiere in 1996, the International Charité Mayo Conference celebrates its 25th anniversary! During these years, our meeting has experienced a continuous growth – with nearly 1,000 participants from about 50 countries last time in Berlin in 2019.

Looking forward to an even wider audience now, we have prepared an extensive agenda with presidential lectures, international panel discussions, the surgical video of the day, intensive workshops, educational, Charité and Mayo perspective sessions, and more ...

Luminaries from all over the world will deliver a program with high impact for the clinical and scientific community – and on the future of women’s cancer management.

We would be very pleased to welcome you, this time in a virtual but nevertheless cordial way. Despite the pandemic, we will do our best to preserve our 25 years history of the International Charité Mayo Conference with controversial and game-changing sessions and very special cultural and personal insights from Berlin.

Sincerely yours,

Prof. Dr. Jalid Sehouli          Prof. Dr. Jens-Uwe Blohmer
Conference Chairs and Scientific Committee
11th International Charité Mayo Conference

Welcome to the 11th International Charité-Mayo Conference!

This year’s edition marks a special anniversary: this conference, which brings together experts in the field of gynecological oncology, was held for the first time 25 years ago. In the years since, it has become an established and renowned event that advances treatment, diagnostics, and prevention and follow-up for gynecological cancers.

The International Charité-Mayo Conference and Berlin, as a hub of medical advances, are a perfect match. Berlin is doing everything in its power to further sharpen its profile as an innovative health care capital and as a top international location in this field.

Unfortunately, because of the coronavirus pandemic, the 11th edition of this prestigious gathering cannot be held in its usual setting. I therefore appreciate all the more the hard work and commitment of the organizers of the International Charité-Mayo Conference. With online and hybrid formats, they have set the stage for concentrated professional exchange despite the current difficult circumstances.

I am sure that this year’s conference, too, will be a source of fresh inspiration both for the scientific community and for patient care. I wish all of the participants thought-provoking and insightful sessions that generate many new ideas.

Michael Müller
Governing Mayor of Berlin

Breast Surgery Slide and Video Session
Moderation: J.-U. Blohmer and O. Camara
- Breast and Axillary Surgery After Neoadjuvant Chemotherapy • J. Heil
- Instead of Wire Markers: Types of Seeds • S. Paepke
- Robotic Breast Surgery • B. Sarfati
- NSME and Implant-based Breast Reconstruction with ADM or Synthetic Meshes • J.-U. Blohmer
- Intraoperative Indocyanine Green Angiography (ICG-A) • M. Karsten
- Lipofilling Breast Reconstruction • S. Kümml
- Free Flaps in Breast Reconstruction • O. Camara
- Surgery of Lymphedema • H. Brorson

12.00 pm  BREAK

12.25 pm  SATELLITE SYMPOSIUM (supported by Seagen)
Change in the Therapy Landscape at HER2-pos. MBC in the Context of the Current Guidelines – From a German and US-American Perspective • J.-U. Blohmer, S. Kümml, C. O’Sullivan, A. Schneeweiss

01.25 pm  GREETING WORDS
Welcome Address by Prof. Dr. Heyo K. Kroemer,
Chairman of the Executive Board, Charité – Universitätsmedizin Berlin

LOCAL THERPAY OF BREAST CANCER
Chairs: J. Heil, S. Paepke

01.30 pm  German Perspective on Current Technical Aspects of Breast Cancer Surgery • S. Kümml
01.45 pm  Charité Perspective on Technical Aspects of Risk-reducing Breast Surgery • J.-U. Blohmer
02.00 pm  Breast and Axillary Surgery After Neoadjuvant Chemotherapy
- Mayo Perspective • J.-C. Boughey
- German Perspective • J. Heil
02.35 pm  Mayo Perspective on Radiotherapy After Implant-based Breast Reconstruction • R.W. Mutter
02.55 pm  Discussion
03.10 pm  Mayo Perspective on Lymphedema After Breast Cancer Surgery: Prevention, Detection and Treatment • S.A. McLaughlin

MEDICAL ONCOLOGY IN BREAST CANCER THERAPY I
Chairs: S. Kümml, R. A. Leon Ferre

03.30 pm  What Drives Metastases in Breast Cancer?
- American AURORA Program • S. Oesterreich and A. Lee
- German CATCH Program • A. Schneeweiss
04.00 pm  Experiences with Patient-derived Xenografts and Cell Cultures and Organoids
- Mayo Perspective • L. Wang
- Charité Perspective • V. Kiver
04.30 pm  Role of RNA and DNA Sequencing in Breast Cancer Therapy • U. Keilholz
04.50 pm  Biomarkers to Guide Therapy of Breast Cancer Patients
- Mayo Perspective • J.M. Carter
- German Perspective • N. Harbeck
MEDICAL ONCOLOGY IN BREAST CANCER THERAPY II

Chairs: D. Speiser, K. J. Ruddy

05.20 pm Presidential Lecture: Endocrine Resistance in Early and Advanced Breast Cancer and Treatment Options After Tumor Progression under CDK4/6 Inhibition • M. P. Goetz

05.45 pm Immunotherapy for Whom and When?

• Mayo Perspective • R. A. Leon Ferre
• German Perspective • G. Pecher

06.15 pm Charité Perspective on HRD-related Therapies • D. Speiser

MEDICAL ONCOLOGY IN BREAST CANCER THERAPY III

Chairs: M. P. Goetz, M. Karsten

06.30 pm Indications, Options, Algorithms in HER2+ Breast Cancer Therapy Today • J. Huober

06.45 pm Mayo Perspective on Prevention of Breast Cancer • A. C. Degnim

PATIENT REPORTED OUTCOME MEASURES IN BREAST CANCER THERAPY

Chairs: A. C. Degnim, U. Keilholz

07.00 pm PROMs in Medical Oncology: A New Study Endpoint/Management of Side Effects of Modern Drugs in Medical Oncology

• Mayo Perspective • K. J. Ruddy

07.15 pm PROMs in Breast Cancer Surgery and Follow-up

• Charité Perspective • M. Karsten

07.30 pm Summary of the Day

M. P. Goetz and J.-U. Blohmer
